The Search Mafia Playbook

Hey, I'm Max.

This is *not* some agency sales pitch. I'm one person who's gone through the grind — building, failing, experimenting, learning. I understand what it means to run a hustle in Jozi, where budgets are tight, content creators overcharge, and your business still needs to show up online.

So here's what I do:

I offer **online optimization services** that focus on free public platforms first ("First Free") and help you lock in reliable visibility without wasting your money.

When you're ready to scale or need a home base, I offer a one-time setup of a business website designed to run on autopilot ("Set and Forget").

WHAT THIS PLAYBOOK IS

This document is your guide to:

- Understanding how I work with small local hustlers
- Seeing exactly what's free, what's paid, and where your business fits
- Knowing what platforms to use first (and how)
- Knowing what I'll do for you if you say, "Let's go."

WHO THIS IS FOR

- Small businesses with no real digital presence
- Hustlers who serve their community and want more local clients
- Anyone who's overwhelmed by websites, content creation, or digital buzzwords

---

HOW I WORK

PHASE 1: **FIRST FREE** (Trial Phase – ±60 days)

You get: - Increased local visibility (Maps, Listings, Search) - Recommendations: quality content assessment - Cybersecurity snapshot: where you stand and what's missing - Website Setup* consult (see below) - Practical solutions implemented on FREE on public platforms

💬 *Why?* Because I believe in showing value before charging.

PHASE 2: **SET AND FORGET** (Value-add Phase)

Once your public platforms are working, it's time to invest in a real digital home.

This includes: - A website designed around YOUR hustle - Mobile-first, content-ready, low-maintenance - Built for visibility and trust — you set it up once, and it works daily

📝 *Note:* The website consultation is free. But full setup incurs a market-related, flat fee — because this takes real time, and I value yours as much as I value mine.

WHAT I PROMISE

- No long-term contracts
- No agency-style vague billing
- You always get clear deliverables
- You get advice from someone who actually used these tools to grow (not just learned them in a course)

NEXT STEP

Let's have a WhatsApp conversation. Drop me a voice note or message telling me what you're hustling and what you want.
